£PROFIT TEXEL

The Texel Sheep Society provides enhanced data collection and performance reporting services to its membership and supports the National Terminal Sire Evaluation.

texelplus indexes have been updated, making them simpler to use and understand.

## In simple terms: higher value = higher profit per lamb

The texelplus economic indexes support the breed's development with an increased focus on commercial traits and profitability. The **TERMINAL** and **REPLACEMENT INDEXES** reflect the breed's influence on industry. Both are presented as the potential extra profit per lamb born in a commercial setting, compared to the population average.

| Index | Average | Top 25% | Top 10% | Top 5% | Top 1% |
|---|---|---|---|---|---|
| **Terminal**<br>Expected change in profit per terminal lamb born | £4.03 | £5.13 | £6.12 | £6.71 | £7.81 |
| **Replacement**<br>Expected change in profit per replacement lamb born | £4.23 | £5.37 | £6.40 | £7.01 | £8.17 |

The **TERMINAL INDEX** supports increased profitability through improving prime lambs and is weighted strongly for meat production. The **REPLACEMENT INDEX** includes additional maternal traits to optimise production of female replacements.

Commercial producers solely producing prime lambs should use the **TERMINAL INDEX** to inform their selection; however, those retaining female replacements should use the **REPLACEMENT INDEX**.

Sub-indexes underpin the indexes to provide more information on the relative values of growth, carcass quality, reproduction, and adult size.

*An example*
*High ranking rams deliver over £6.00 per lamb more than lower-ranking rams. Over a ram's working lifetime, this is easily worth an extra £1,500 per ram; generated through shorter finish times and improved carcass quality.*

### Trait weighting

Different emphases are given to individual traits between the terminal and replacement indexes. This results in different sub-index values.

### Reproduction sub-index

The commercial benefit of lambing ease, litter size and maternal ability. Promotes optimum litter sizes and better mothers.

### Adult size sub-index

The benefit of mature size as a replacement ewe. Promotes smaller animals as they require less maintenance.

### Growth sub-index

Captures the benefit from growth using eight-week weight and scan weight information. Faster growth is more advantageous.

### Carcass sub-index

The value of muscle and fat weight in the carcass. Encourages muscle growth with fat cover.

### Accuracy

A measure of accuracy of the index. The higher the number the better.

### Index values

The sum of the sub-index values and potential profit per lamb born for terminal and replacement production.

### Ranking

Where the animal ranks compared to the current average animal.
