HOLLYFORD FLOCK

FOREWORD

The Hollyford flock was founded on 12 ewes from the Highfields flock, which Alan managed for many years in East Sussex and have developed it further since moving to Devon in 2004 gradually expanding the flock from there on, but expansion hasn't been done at the expense of quality.

This has resulted in the Hollyford Texel ewes producing high performance, big, fast growing, and easy finishing rams with outstanding tops and excellent gigots. Rams that produce lambs that finish with high weights and grade easily without the need for creep food.

This has been achieved through rigorous selection and culling, leading to a flock with slightly more neck, which has led to easier presentations and lambings and is virtually free of foot rot. It has also been selected hard for easy fleshing, good tops, tight skins, teeth and legs.

We sell mainly to commercial buyers and they want powerful shearlings capable of tugging decent numbers of ewes without being overfed and without excessively large heads. Feedback from our commercial customers is essential and shapes the breeding decisions we make. Performance recording is becoming more important for many of them, but of upmost importance is easy fleshing and good tops.

This has produced ewes that are easy care, lamb easily, milk heavily, are excellent mothers and will rear two fast growing lambs really well.

Ewes in our flock were sired by Knock Oregano, Knock Papoose, Hollyford Powerhouse, Goldies Supreme, Cambwell Terminator and Whitehart Taylormade.

With this in mind service sire selection is based on extensive research with Alan often spending time visiting flocks to see female families before deciding to use a ram. We AI 90% of the ewes and buy semen from tups I've liked at the sales, or rams that are producing the fast growing lambs that we require. We mainly sell to commercial customers so don't need, or necessarily want, to be at the forefront of the fashionable genetics.

The Highfields and Hollyford flocks have been performance recorded for 35 years, this information is used as one of the tools of selection but is not paramount when selecting females. A level of index is set, usually in the top 10% of the breed, for replacement females to qualify for the selection pen and then the records are left to the side and the best sheep are selected as replacements. Major progress has been made in mature size and growth rates by using rams of high scan weight EBV onto ewes of high scan weight EBV, i.e. DHA 14 00255 has a scan weight EBV of 14.28 and was mated by DHA 15 00309 with a scan weight EBV of 14.24, the result being a very high index lamb DHA 16 00419, one of twins, index 443. This being the outstanding ram lamb of 2016.

We have achieved many successes, which include twice winning Champion and Reserve Champion Live lambs at the Welsh Winter Fair, twice Champions of the English National Primestock, both live and carcase Champions at Smithfield, winners of the Jubilee Texel Carcase Championship and PRT Champion at the NSA Builth main ram sale.

We have paid careful attention to each ewe's progeny as they develop during the year, and if a ewe isn't producing the type of sheep they want and that our customers want then we cull her. We can't afford to carry passengers.

Shearling ewes are by Cambwell Trademark, Hollyford Winston, who sold for 3200gns at Builth 2016, Hollyford What A Boy, probably the only double muscled ram in the top 1% of the breed, Alwent Weightman, who was the fastest growing lamb in the Alwent flock in 2016 and one triplet lamb by Goldies Supreme.

We very much look forward to welcoming you all to Worcester for our female dispersal and hope you will be pleased with the sheep on offer.
