The aim of EBVs are to allow buyers to see how much of an animal's performance is due to its breeding (genetics) and how much has been influenced by the environment that they have been kept in – management, feeding, farm location, housing etc

An animal will pass on half of its genetic merit to its offspring.

e.g., if Ram A has a Scan Weight of +3.33 then his progeny at scanning will be over 1.5kg heavier than average

Cambwell Gimmers for this year's sale

FOREWARD

2020 has been another successful season for the Cambwell Flock. The first 40 Tup Lambs sold to average £1,025 topping at 10,000gns for Cambwell Dynamite with a quarter share being retained.

Scrogtonhead Class Act and Loosebeare Chief were each sold for £10,000 and are both grandsons of gimmers purchased from Cambwell at the Select Seven for 2,300gns and 5.000gns respectively.

Gimmers have already sold for 3,100gns at Worcester for a daughter of Langford Adder Again out of Cambwell Belter's mother.

All online bidders can be reassured that all the Cambwell Gimmers have perfect mouths and pasterns and this batch represents a cross section of the best breeding families who are bred for longevity, carcase and easy fleshing.

We have had another very commercially consistent year once again selling over 60 Texels to a strong average. The half or full brothers to our sale gimmers have produced our best ever crop of prime lambs which are averaging almost £100 per head from cross and hill ewes

We look forward to seeing one and all at the sale once again and will be delighted to have a blether with friends and customers old and hopefully new!!
