Curley & Cherrylea texels

The Curley flock was established 2000 with the Cherrylea flock established 2021. We strive to produce quality texels for the commercial and pedigree markets.

Females sold from the flock previously have regularly went on to be successful for the purchasers. Some of these include the ewe lamb sold privately to Oberstown who went onto breed Usain Bolt who needs no introduction to the texel world. Supreme champion Ballymena Premier sale 2019 for Seamus McCloskey bred by a Curley ewe. The 4k Curley Boudicca sold at the Gems 2019 to Ballyhivistock Texels produced 2 tup lambs retained for breeding within the flock and went onto win the flock competition in the ages ram class.

Our sale success this year came from Cherrylea For I'm The Man sold privately to Robbie & James Walker Kilcourley Texels for 8k. With 3 more ET brothers selling for 3k ,2k & 1.7k respectively all going to pedigree flocks.

This year Curley & Cherrylea have 14 gimmers from the best bloodlines within the flock. Mainly sired by Lakeview Dirty Dancer.

All gimmers are in lamb to the new joint purchase Auldhouseburn Fandabidozi for 20k.

All gimmers are Heptavac P system and have been vaccinated with Enzovax and Toxovax.

We would like to wish buyers every success with their purchases.

Enquires and on farm viewing welcome.

HEXEL TEXELS

We are delighted to return to the January Gems in Ballymena, 2023.

We have sent over a couple of select gimmers, in lamb to Rhaedar Entrepreneur, sire of the year 2022, and would like to thank Mark Priestley for looking after them, and Alasdair Gault and Andrew Moses for taking them across the water.

Our four ewe lambs have also been carefully selected, including full sisters to DiDi, Escobaa, and Fan Club, and we wish all the prospective purchasers well with them. Our grassland is farmed organically and regeneratively, so our sheep go on and do well for purchasers.

Inbreeding within the national pedigree Texel flock

Use the Mating Predictor Tool now on iTexel

Members are encouraged to use the mating predictor on iTexel to manage levels of inbreeding within their flocks. You cannot assess ewe/ram combinations by eye. The Mating Predictor estimates the inbreeding value of the offspring from a particular pairing.

The predictor is available on your smart phone as well as desktop

To check the ram(s) you're interested in purchasing and see how they combine with your ewes:

1. Login to iTexel, click Mating Predictor
2. Choose 'New Combination' to select a Sire and Ewes
3. Click 'View Results'
4. A summary will appear with the number in brackets displaying the predicted inbreeding coefficient. A coefficient below 7 is desirable

Inbreeding can be defined as the mating of related individuals, or of individuals with shared ancestors. A balance needs to be maintained between selecting animals to optimise rates of genetic gain and minimise levels of inbreeding.

Increasing levels of inbreeding can result in inbreeding depression, where performance can suffer. It can be argued that any animal is only one mating away from being outbred.

Each animal's inbreeding coefficient value is now displayed in the sales catalogue. The lower the level of inbreeding the better; a value of 7% or below is regarded as an acceptable level of inbreeding within a breeding programme.
