AUCTIONEER'S CONDITIONS OF SALE

1. **BIDDING:** the highest bidder shall be the purchaser and any dispute which arises shall be settled by the Auctioneer who shall regulate the bidding and have the right to refuse a bid.
2. **GUINEAS:** All sheep at the sale shall be sold in guineas unless otherwise stated.
3. **PURCHASER'S RESPONSIBILITY:** Each lot shall be at the sole risk of the purchasers at the fall of the hammer.
4. **PAYMENT:** All purchases shall be paid for on the day of sale direct to the Auctioneers before removal and no lot to be removed without written authority of the Auctioneers. Cheques will not be accepted unless prior arrangements with the Auctioneers have been made. Where a purchaser defaults in payment, the Auctioneers reserve the right to re-sell the lot and to charge the purchaser with any expenses and loss incurred by the reason of the failure of the Purchaser to complete his purchase. The Auctioneers reserve the right to charge interest at the current bank overdraft rate on any outstanding accounts from the day of sale unless special arrangements have been made with the Auctioneer in this respect.
5. **DESCRIPTION:** The descriptions are supplied by the vendors who alone are responsible for details and accuracy. The auctioneers will not be answerable in respect of any errors which may occur in the catalogue. The Auctioneers may make an intimation of any alteration or modification of the catalogue description of any lot immediately before the asking for bids. The Auctioneer shall be the sole and executive judge of the fact of such intimation and the terms in which it is made.
6. Any dispute over warranties, pedigrees or matters not dealt with specifically in these conditions will be settled in accordance with the rules of the British Texel Sheep Society.
7. The Sales Committee may appoint, at their discretion, an arbitrator acting under the Arbitration Acts for the time being in force, in order to resolve any dispute. In each case the person having the reference shall have full power to include in his award provisions for costs and expenses including the keep and transport of the animal.
8. Without prejudice to the discretion of any person making an award as aforesaid, the purchaser shall be responsible for the cost of returning the animal to the sale yard or elsewhere at the Auctioneers' discretion and the vendor shall pay reasonable lairage until collection of that lot.
9. Purchasers are responsible for ascertaining the genotype of individual sheep from the vendors.

CONDITIONS OF SALE

All sheep will be sold under the Auspices of the Texel Sheep Society and the Conditions of sale relevant to individual sales. These can be viewed at [texel.uk/societyrules](https://www.texel.uk/societyrules)

Auctioneers also display copies of the Conditions of sale within the auction house.

DISCLAIMER

The pedigree, performance, genomic information stored by the Society in the iTexel database and published on society pedigree certificates, reports and general publications is as supplied by, or on behalf of the breeder. The responsibility for the accuracy of the information therefore rests solely with the breeder and not with the British Texel Sheep Society Ltd (BTSS).

Health information and footnotes that are stored in iTexel and published in sales catalogues produced by the society, is supplied by or on behalf of the vendor. The responsibility for the accuracy of the information therefore rests solely with the vendor and not with the British Texel Sheep Society Ltd (BTSS).

Performance data and breeding values change over time as new data becomes available.

Whilst every effort is made to ensure accuracy of the information contained in society reports and publications, no responsibility can be accepted by the Society for any errors or any reliance on the use of information. No warranty is given in respect thereof by the BTSS and, to the maximum extent permitted by law, the BTSS have no liability for any loss, damage or injury howsoever caused (including that caused by negligence) or suffered directly or indirectly in relation to information and opinions contained or omitted from BTSS publications.

The Texel Sheep Society provides enhanced data collection and performance reporting services to its membership and supports the National Terminal Sire Evaluation.

texelplus indexes have been updated, making them simpler to use and understand.

In simple terms: higher value = higher profit per lamb

The texelplus economic indexes support the breed's development with an increased focus on commercial traits and profitability. The **TERMINAL** and **REPLACEMENT INDEXES** reflect the breed's influence on industry. Both are presented as the potential extra profit per lamb born in a commercial setting, compared to the population average.

Index	Average	Top 25%	Top 10%	Top 5%	Top 1%
Terminal Expected change in profit per terminal lamb born	£4.03	£5.13	£6.12	£6.71	£7.81
Replacement Expected change in profit per replacement lamb born	£4.23	£5.37	£6.40	£7.01	£8.17

The **TERMINAL INDEX** supports increased profitability through improving prime lambs and is weighted strongly for meat production. The **REPLACEMENT INDEX** includes additional maternal traits to optimise production of female replacements.

Commercial producers solely producing prime lambs should use the **TERMINAL INDEX** to inform their selection; however, those retaining female replacements should use the **REPLACEMENT INDEX**.

Sub-indexes underpin the indexes to provide more information on the relative values of growth, carcass quality, reproduction, and adult size.

An example

High ranking rams deliver over £6.00 per lamb more than lower-ranking rams. Over a ram's working lifetime, this is easily worth an extra £1,500 per ram; generated through shorter finish times and improved carcass quality.

Trait weighting

Different emphases are given to individual traits between the terminal and replacement indexes. This results in different sub-index values.

Reproduction sub-index

The commercial benefit of lambing ease, litter size and maternal ability. Promotes optimum litter sizes and better mothers.

Adult size sub-index

The benefit of mature size as a replacement ewe. Promotes smaller animals as they require less maintenance.

Growth sub-index

Captures the benefit from growth using eight-week weight and scan weight information. Faster growth is more advantageous.

Carcass sub-index

The value of muscle and fat weight in the carcass. Encourages muscle growth with fat cover.

Accuracy

A measure of accuracy of the index. The higher the number the better.

Index values

The sum of the sub-index values and potential profit per lamb born for terminal and replacement production.

Ranking

Where the animal ranks compared to the current average animal.
