SPECIAL CONDITIONS OF SALE

1. All animals will be subject to a veterinary inspection. Their decision is final.
2. Animals **MUST** be in the auction by no later than 9.30am for the veterinary inspection. In the event that the vendors misses this deadline they will be responsible for the call out fee of the vet to come back and inspect.
3. All sheep will be sold subject to the condition of sale of the British Texel Sheep Society (By-Laws 11 & 12) and to the Auctioneer's General Conditions Of Sale, which are available at the auctioneers office.
4. Sheep will only be accepted into the market and penned for sale if they are accompanied by an official MV status certificate completed correctly.
5. All sheep will be identified with a lot number hung around their neck.
6. **All substitute Lots MUST be completed electronically (on Itextel) no later than 12 noon on Thursday 8th August 2024.**
7. Some straw will be supplied in each pen, if the vendor requires any more it is their responsibility to take their own.
8. The auction mart will be open between 3pm-6pm on Saturday 10th August 2024, should you wish to go and set your pen(s) up ready for your animals to enter on the Sunday morning.
9. Any vendor that is travelling from afar and staying locally the night before the sale, must make arrangements directly with the auction mart, should they wish for their animals to stay there overnight.

SHOW RULES

1. The first class of animals must make their way to the show ring at 8.30am prompt.
2. Each vendor may submit a maximum of 2 animals per class in the show.
3. Any animals entered in the 'natural born' class will be verified as entitled to be there.
4. Prize money and trophies will only be awarded if the prize winning animal is sold through the sale ring.
5. All trophies **MUST** be signed for at the auction mart office. Any trophies not signed for will be retained by the Club Secretary.
6. Rosettes will be awarded for 1st to 6th place.

The Texel Sheep Society provides data collection and performance reporting services to its membership. From 2024, the service and evaluation combines pedigree and genomic data to provide indexes that are simple to use and understand.

In simple terms: **higher value = more profit per lamb**

The texelplus economic indexes support the breed's development with an increased focus on commercial traits and profitability. The **TERMINAL** and **REPLACEMENT INDEXES** reflect the breed's influence on industry. Both are presented as the potential extra profit per lamb born in a commercial setting, compared to the population baseline.

Index	Average	Top 25%	Top 10%	Top 5%	Top 1%
Terminal Expected change in profit per terminal lamb born	£3.75	£5.01	£6.14	£6.82	£8.10
Replacement Expected change in profit per replacement lamb born	£4.26	£5.64	£6.88	£7.62	£9.01

The **TERMINAL INDEX** supports increased profitability through improving prime lambs and is weighted strongly for meat production. The **REPLACEMENT INDEX** includes additional maternal traits to optimise production of female replacements.

Commercial producers solely producing prime lambs should use the **TERMINAL INDEX** to inform their selection; however, those retaining female replacements should use the **REPLACEMENT INDEX**.

Sub-indexes underpin the indexes to provide more information on the relative values and ranking of animals for growth, fat and muscle weight, and reproduction.

An example

High ranking rams deliver over £4.50 per lamb more than lower-ranking rams.

Over a ram's working lifetime, this is easily worth an extra £690 per ram; generated through shorter finish times and improved carcass quality.

Trait weighting

Different emphases are given to individual traits between the terminal and replacement indexes. This results in different sub-index ranks.

Growth sub-index

Captures the benefit from growth using eight-week weight and scan weight information. Faster growth is more advantageous.

Muscle weight sub-index

How an animal ranks for muscle weight in the carcass. Encourages muscle growth.

Fat weight sub-index

How an animal ranks for fat weight in the carcass. Encourages fat cover.

Reproduction sub-index

The commercial benefit of lambing ease, litter size and maternal ability. Promotes optimum litter sizes and better mothers.

Accuracy

A measure of the accuracy of the index. The higher the number the better.

Index values

The sum of the sub-index values and potential profit per lamb born for terminal and replacement production.

Ranking

Where the animal ranks in the population.
