DISCLAIMER

The pedigree, performance, genomic information stored by the Society in the iTexel database and published on society pedigree certificates, reports and general publications is as supplied by, or on behalf of the breeder. The responsibility for the accuracy of the information therefore rests solely with the breeder and not with the British Texel Sheep Society Ltd (BTSS).

Health information and footnotes that are stored in iTexel and published in sales catalogues produced by the society, is supplied by or on behalf of the vendor. The responsibility for the accuracy of the information therefore rests solely with the vendor and not with the British Texel Sheep Society Ltd (BTSS).

Performance data and breeding values change over time as new data becomes available.

Whilst every effort is made to ensure accuracy of the information contained in society reports and publications, no responsibility can be accepted by the Society for any errors or any reliance on the use of information. No warranty is given in respect thereof by the BTSS and, to the maximum extent permitted by law, the BTSS have no liability for any loss, damage or injury howsoever caused (including that caused by negligence) or suffered directly or indirectly in relation to information and opinions contained or omitted from BTSS publications.

The Texel Sheep Society provides data collection and performance reporting services to its membership. From 2024, the service and evaluation combines pedigree and genomic data to provide indexes that are simple to use and understand.

In simple terms: higher value = more profit per lamb

The texelplus economic indexes support the breed's development with an increased focus on commercial traits and profitability. The **TERMINAL** and **REPLACEMENT INDEXES** reflect the breed's influence on industry. Both are presented as the potential extra profit per lamb born in a commercial setting, compared to the population baseline.

Index	Average	Top 25%	Top 10%	Top 5%	Top 1%
Terminal Expected change in profit per terminal lamb born	£4.08	£5.33	£6.46	£7.13	£8.40
Replacement Expected change in profit per replacement lamb born	£4.72	£6.10	£7.34	£8.09	£9.48

The **TERMINAL INDEX** supports increased profitability through improving prime lambs and is weighted strongly for meat production. The **REPLACEMENT INDEX** includes additional maternal traits to optimise production of female replacements.

Commercial producers solely producing prime lambs should use the **TERMINAL INDEX** to inform their selection; however, those retaining female replacements should use the **REPLACEMENT INDEX**.

Sub-indexes underpin the indexes to provide more information on the relative values and ranking of animals for growth, fat and muscle weight, and reproduction.

An example

High ranking rams can deliver over £4.50 per lamb more than lower-ranking rams. Over a ram's working lifetime, this is easily worth an extra £690 per ram; generated through shorter finish times and improved carcass quality.

Trait weighting

Different emphases are given to individual traits between the terminal and replacement indexes. This results in different sub-index values.

Growth sub-index

Captures the benefit from growth using eight-week weight and scan weight information. Faster growth is more advantageous.

Muscle weight sub-index

How an animal ranks for muscle weight in the carcass. Encourages muscle growth.

Fat weight sub-index

How an animal ranks for fat weight in the carcass. Encourages fat cover.

Reproduction sub-index

The commercial benefit of lambing ease, litter size and maternal ability. Promotes optimum litter sizes and better mothers.

Accuracy

A measure of the accuracy of the index. The higher the number the better.

Index values

The sum of the sub-index values and potential profit per lamb born for terminal and replacement production.

Ranking

Where the animal ranks in the population.

We have put forward a pen of gimmers which we feel compliments the type of texel we aim to breed. These are a select bunch with a few which were meant for stock but always feel we should sell a number of gimmers which we ultimately would like to be able to go looking for their progeny in the future

Gimmers sold previously have bred sons selling up to 30,000gns and gone on to win many championships at shows around the country

Our girls are all double jabbed with Heptovac P and vaccinated with Enzovax and Toxovax

We are delighted to offer a handful of specially selected stock ewe lambs, from the best lines in the flock

All of our ewe lambs will be sold this Christmas, apart from our flush team

None will be retained for the in-lamb gimmer sales next year, so presenting the best we have to offer

Our grassland is farmed organically and regeneratively, so our sheep go and do well for purchasers

We wish all our customers every success with them!

Donald and Ross

"Cambwell Texels - Established 1974"

Scrapie Monitored Flock

2024 has been another consistent year from the Cambwell flock with an increase in averages at all the Main Sales. The highlights were selling the Top Price Ram Lamb, Cambwell Hulk, at the English National Show & Sale for 7,000gns, and also topping at £7,000 at Kelso Ram Sales.

The Top Price Shearling Ram at J36 and the Scottish Club Show & Sale were also sired by our jointly owned stock ram, Deveronvale Fastrac – who won Reserve Champion at the National Show at Biggar after being placed second to the Champion at the Royal Highland Show in 2023.

CAMBWELL HULK (LTC24 07973)

- Sold at the English National Show & Sale at Worcester, August 2024 for 7,000gns.
- Sired by Deveronvale Fastrac.
- From the same family as Lot 122, Lot 125, and Lot 126.

The Craighead flock of Texels was founded in 1978 with the purchase of a Ewe Lamb from the Prevost flock in France. Further gimmers have been purchased in over the years from Milnbank, Turin and Ettrick flocks.

We have enjoyed many successes in both the show and sale rings over the years with sheep regularly receiving prizes at the Royal Highland Show, being Reserve Champion twice. In the sale ring - Gimmers; Ram Lambs; and Ewe Lambs have been sold to top flocks at both National Sales and Club Sales. Ram Lambs have sold to 50,000gns for Craighead Hercules; 27,000gns for Craighead Yankee; 26,000gns for Craighead Dynamite; and 15,000gns for Craighead Crackerjack. Females have sold to a top of 13,000gns and 5,500gns four times at the Select Seven Sales. Notable sires used over the years include: Parkhouse Value; Ettrick Glenmorangie; Hartside All Star; Fordafourie Amalert; and Uskvale Crackerjack.

With the entire Adult Portion of the flock being sold last year, this is the final offering of Texels from the Craighead flock. Progeny from last year's dispersal have sold to £35,000. All gimmers forward are sired by Sadlerhead Ferrari who is a full brother to Sadlerhead Fury who himself has bred lambs to 42,000gns and Shearlings to £35,000.

We would like to thank everyone who has supported us over the years and wish all prospective buyers the very best of luck with their purchasers.

All stock will be Insured for three months at the fall of the hammer.

CRAIGHEAD (CMC22 03235)

Sold at the Craighead Dispersal at Lanark, September 2023 for 7,000gns and was purchased jointly by the Teiglum and Harestone flocks
