Debit cards incur no charges - Credit card payments incur a 2% charge

TEXEL: Powering British sheep farming

As the leading terminal sire in the UK, the Texel breed is known to perform in a wide variety of farming systems the length and breadth of the UK.

Now, thanks to routine genomic evaluations, the information available to buyers is significantly enhanced, with greater accuracy in performance indexes for Texels, offering both pedigree and commercial buyers a new level of confidence when selecting Texel rams for their flocks.

Genetic improvement at a breed level is on the up, with a 15% increase in the rate of genetic gain in terminal index in the last five years, compared to the five years before that. The Texel breed continues to deliver more to the industry.

Genomic evaluations, combined with the Society's introduction of profit-focused indexes means selecting the right Texel has never been easier.

Indexes focus on both terminal and replacement traits, making it simpler to choose animals based on the value they'll bring to your business. Higher ranked animals offer greater performance

for commercial producers. Indexes are published as a measure of the potential profit per lamb born in a commercial setting, compared to the population baseline.

In a commercial flock, a Texel ram ranked in the Top 5% has the potential to add more than **£690** to the value of his progeny over a three-year working life compared to the average. Something no-one can afford to ignore in an era of tight margins and unknown future support payments.

There is something for everyone within the Texel breed, whether you want to produce fast growing, high yielding prime lambs or top-quality replacement females, Texel is the breed that can deliver more!

Why gamble on the future of your business when you can bank on Texel?

John Yates

NORTHERN IRELAND NATIONAL SHOW & SALE PROGRAMME

Bye Law 11.6

No dressing, trimming, clipping of the fleeces, or eye lashes of sheep will be permitted. No artificial whitening on any part of the sheep is permitted. An inspector may be present at the sale or show, they have the authority to disqualify any sheep, which in their opinion, are below a minimum standard with regard to breed type or are found to be contravening the Society Byelaws, right up to the point of sale. The decision of the inspector shall be final and failure to accept the inspector's decision will result in the entire consignment being rejected.

Friday 29th August 2025

12:00 – 16:00 Arrival of sheep and inspection **prior** to penning. Any sheep not inspected by 16:00 will not be eligible to be shown and sold.

17.00 Judging of all classes by Will McCaffrey – Scholars and Cressage flocks.
Presentation of prizes will take place after each class.
One entry per class, per vendor and sheep may only be shown in one class (other than the Group of Three).

Class 1: Shearling Ewe

Class 2: Shearling Ram

Class 3: NITYBC Ram Lamb

This class is open to any full Member of the NI Texel Young Breeders, handling a ram lamb that is bred within a registered flock and shown by the flock owner as per the NITYBC database and Society's database at close of entry. Judging to be based on the sheep not the young handler. If successful, the young handler must go forward to the Championship with the same lot. Eligible list on page 10

Class 4: Open Ram Lamb

Class 5: Non-ET Ram Lamb

Only ram lambs bred by natural service or AI. Lambs by embryo transfer (ET) are not eligible.

Class 6: **texelplus** Ram Lamb

Restricted to Ram Lambs that have their Terminal & Replacement Indices published in this catalogue.

Class 7: Group of Three Ram Lambs bred by exhibitor (Non-Championship)

After the Championship has taken place

NITYBC Young Handlers Class – Junior (12 and under)

NITYBC Young Handlers Class – Senior (13 - 18)

Classes open to all young handlers, handling any sheep, from any vendor.

Judging to be based on the handler, and not the sheep. (Non-Championship)

Saturday 30th August 2025

09.00 Sale of Ram Lambs

09:30 Sale of Shearling Rams followed by Shearling Ewes

Inbreeding within the national pedigree Texel flock

Use the Mating Predictor tool on iTexel

Members are encouraged to use the Mating Predictor that is available on all devices through iTexel to manage levels of inbreeding within their flocks. Ewe / ram combinations cannot be assessed by eye. The Mating Predictor estimates the inbreeding values of lambs produced from a mating of any birth notified or registered ram in iTexel and any ewe in your flock, plus any registered alive ewe up to five-years old.

To check the ram(s) you're interested in purchasing and see how they combine with your ewes:

1. Log in to iTexel, click on Mating Predictor
2. Choose 'New Combination' to select sire(s) and ewes
3. Click on 'View Results'
4. A summary will be displayed, the number in brackets is the predicted inbreeding coefficient. A value below 7 is desirable

Inbreeding can be defined as the mating of related individuals, or of individuals with shared ancestors. A balance needs to be maintained between selecting animals to optimise rates of genetic gain and minimise levels of inbreeding.

Increasing levels of inbreeding can result in inbreeding depression, where performance can suffer; though it can be argued that any animal is only one mating away from being outbred.

The lower the level of inbreeding the better, though a threshold value of 7% has been determined to be an acceptable level of inbreeding within a breeding programme. The estimate of inbreeding is based on the relatedness of individuals in a pedigree, examples of inbreeding values for different matings are presented below.

Relationship	Inbreeding coefficient (F)
Father × daughter or mother × son	25.0 %
Brother × sister	25.0 %
Grandfather × granddaughter or grandmother × grandson	12.5 %
Half-brother × half-sister	12.5 %
Uncle × niece or aunt × nephew	12.5 %
Great-grandfather × great-granddaughter or great-grandmother × great-grandson	6.25 %
Half-uncle × niece or half-aunt × nephew	6.25 %
First cousins	6.25 %

XST	TITANIUM	MR SAM MCNEILLY

Genotyping adds value to pedigree and performance

The benefits of genotyping your animals include:

- + More reliable pedigrees through parentage verification
- + Enhanced health insights, including genotypes for Scrapie and Microphthalmia
- + Improved performance accuracy, especially in young lambs
 - + Providing increased confidence in selecting top animals for breeding
 - + And leading to faster genetic gain in commercially valuable traits
- + Extra information for potential buyers that they can depend on

DNA kits can be requested through the DNA kit page for all animals as soon as they've been added to iTexel.

Conditions Of Sale

All sheep will be sold under the Auspices of the Texel Sheep Society and the Conditions of sale relevant to individual sales. These can be viewed at texel.uk/societyrules

SCAN HERE

Auctioneers also display copies of the conditions of sale within the market.

Neck tags supplied by the Society must be worn by all sheep for sale prior to the inspection.

Individual animal ID numbers on ear tags must match the ID number displayed in the sales catalogue and substitute catalogue.

DISCLAIMER

The pedigree, performance, genomic information stored by the Society in the iTexel database and published on Society pedigree certificates, reports and general publications is as supplied by, or on behalf of the breeder. The responsibility for the accuracy of the information, therefore, rests solely with the breeder and not with the British Texel Sheep Society Ltd (BTSS).

Health information and footnotes that are stored in iTexel and published in sales catalogues produced by the Society, is supplied by or on behalf of the vendor. The responsibility for the accuracy of the information, therefore, rests solely with the vendor and not with the British Texel Sheep Society Ltd (BTSS).

Performance data and breeding values change over time as new data becomes available. Whilst every effort is made to ensure accuracy of the information contained in Society reports and publications, no responsibility can be accepted by the Society for any errors or any reliance on the use of information. No warranty is given in respect thereof by the BTSS and, to the maximum extent permitted by law, the BTSS have no liability for any loss, damage or injury howsoever caused (including that caused by negligence) or suffered directly or indirectly in relation to information and opinions contained or omitted from BTSS publications.

SCRAPIE MONITORING SCHEME (SMS)

This event will be operated as a 'un-segregated' sale therefore any sheep from SMS flocks will need to meet the SMS rules in regard to ARR/ARR scrapie genotype certification.

Members are reminded that if they bring animals to this event which do not have the certification, they will be unable to return with them without risking their flock health status. This is the responsibility of the members.

AUCTION MART RULES FOR VENDORS

The shepherd in charge must bring their respective lots forward, take them to and from the sale ring, attend until delivered and assist in trucking if required as the auctioneers will be responsible only for what is delivered to the purchaser. Should the shepherd not be in attendance at the time his lots fall to be sold, it will be passed over and taken at the end of sale.

All stock will proceed in the order of the catalogue and all lots not previously entered will be sold only when the list is finished.

All purchases to be settled for and taken delivery of on the day of sale.

No stock can be removed without a pass.

Purchasers should see that their stock is correct before leaving the gates, as no deduction can be made afterwards.

No private sales prior to the Stock being offered by auction will be allowed or recognized by the salesman.

The usual commission must be paid on consignments sold privately within this market.

Every assistance in loading or keeping overnight, for the accommodation only of buyers, will be arranged, as far as possible, by the auctioneers, who will not be responsible for loss or damage incurred thereby.

Texel Sheep Society National Sales Minimum Selling Price		
Ram Lambs	Shearling Rams	Shearling Ewes
300gns	300gns	300gns

Anyone from the **Republic of Ireland** who is considering buying sheep at any export sales, there is a new requirement to be registered as a validated ovine establishment on TRACES NT to allow the creation of export health certificates.

To do this you need to email Traces@agriculture.gov.ie with your name, address, flock/herd number and details of any transport credentials **before** the sale date.

Purchasers from **other European Countries** who are considering buying sheep at any export sales, should enquire with their own authorities for the paperwork required.

texelplus

adding value

The Texel Sheep Society provides data collection and performance reporting services to its membership. The National British Texel sheep evaluation combines pedigree and genomic data to provide Indexes that are simple to use and understand.

Higher value = more profit per lamb

texelplus economic indexes support the breed's development with a focus on commercial traits and profitability. Over the last five years there has been a 15% increase in the rate of genetic gain in the terminal index, providing increased benefits to commercial producers choosing Texel.

Index	Average	Top 25%	Top 10%	Top 5%	Top 1%
Terminal Expected change in profit per terminal lamb born	£4.12	£5.38	£6.51	£7.19	£8.46
Replacement Expected change in profit per replacement lamb born	£4.80	£6.19	£7.46	£8.21	£9.62

The **TERMINAL** and **REPLACEMENT INDEXES** reflect the breed's influence on industry, with both presented as the potential extra profit per commercial lamb born, over the population baseline. The **TERMINAL INDEX** is weighted for meat production and supports increased profitability through improving prime lambs. The **REPLACEMENT INDEX** includes additional maternal traits to optimise production of female replacements.

Commercial producers solely producing prime lambs should use the **TERMINAL INDEX** to inform their selection; however, those retaining female replacements should use the **REPLACEMENT INDEX**.

Sub-indexes underpin the indexes to provide more information on the relative values and ranking of animals for growth, fat and muscle weight, and reproduction

An example

High ranking rams can deliver over £3.00 more per lamb than lower-ranking rams. Over a ram's working lifetime, this is easily worth an extra £690 per ram; generated through shorter finish times and improved carcass quality.

Replacement	TOP 1%	TOP 25%	AVG+	TOP 1%	£10.06	67%	TOP 1%

Accuracy

Trait weighting

Different emphases given to individual traits in the terminal and replacement indexes, resulting in different sub-index ranks. AVG+ indicates above average animals.

Growth

The benefit from growth using eight-week weight and scan weight information. Faster growth is more advantageous.

Fat weight

Ranking for fat weight in the carcass. Encourages fat cover.

Reproduction

The commercial benefit of lambing ease, litter size and maternal ability. Promotes optimum litter sizes and better mothers.

Muscle weight

Ranking for muscle weight in the carcass. Encourages muscle growth.

Accuracy

A measure of the accuracy of the index. The higher the number the better.

Index values

The sum of the sub-index values and potential profit per lamb born.

Ranking

Where the animal ranks in the population.

Further information on texelplus services and help on understanding breeding values and indexes is available at texel.uk/texelplus

Register your new stock rams now.

Remember to register your new stock rams now and prior to 1st December to qualify for the lower fees.

All rams must be genotyped prior to registration at members' cost using the Society's genotyping service.

If the ram has been genotyped

- Email registrations@texel.co.uk with your proof of purchase
- Once confirmed, the ram will be registered into your flock

If the ram has not been genotyped

- Request a DNA kit for him through the DNA Kit page on iTexel
- Sample him and return it to the office
- Kits can also be collected and returned to Society staff on the day of the sale

SHEEP SOCIETY

BETTER BREEDING

For two decades, our animal DNA tests have enhanced selection, breeding and marketing decisions. Today, Neogen® is a world leader in genomic solutions and services.

Our customers can choose solutions from our extensive testing portfolio to make profitable choices about their animals. Our many services include:

- Testing such as Scrapie
- DNA screening for parentage, commercial traits, genetic recessives and causative mutations
- Genotyping to determine genetic merit & genomic breeding values

**Contact us today, for more information on our
genomic solutions for sheep, beef and dairy**
