Unlock the Genetic Potential of Your Texels

Genotyping provides the confidence and information today's breeders and buyers rely on, delivering:

- + Verified pedigrees through parentage verification
- + Valuable health information (see table below)
- + More accurate performance figures, particularly in young lambs
- + Greater confidence when selecting future breeding stock
- + Faster genetic progress in commercially important traits
- + Trusted information that adds value for potential buyers

	Scrapie	Microphthalmia	Maedi Visna
Most resistant (desirable)	ARR/ARR	G/G	1,1 4,4 1,4
Genetically resistant, need careful breeding selection	ARR/AHQ ARR/ARH ARR/ARQ	C/G (Carrier)	
Little resistance, need careful breeding selection	AHQ/AHQ AHQ/ARH AHQ/ARQ ARH/ARH ARH/ARQ ARQ/ARQ		
Susceptible, can be used to breed towards more resistance			*,1 *,4 1,*, 4,*,
Most susceptible			2,2 3,3, 2,3

ET donors (born from 2025-onwards) and males to be registered must be genotyped otherwise their progeny will not be able to be added to iTexel.

All other stock can be genotyped to provide more flock insights. DNA kits can be requested for any animal as soon as it has been added to iTexel.

Scan the QR code to learn more about the Society's genotyping

service

New Stock Rams

Remember to register your new stock rams before 1st December to benefit from the lower registration fee.

Already genotyped?

- Email registrations@texel.co.uk with your proof of purchase.
- Once confirmed, your ram will be transferred into your flock.

Not yet genotyped?

- Request a DNA kit through the DNA Kit page on iTexel.
- Take the sample and return it to the Society office.

Performance Pays with Texel Indexes

Breed Better. Buy Smarter. Reduce Risk.

Texel Performance Indexes are designed to help commercial producers and pedigree breeders identify animals with the greatest potential to improve flock profitability.

Higher Value = Higher Potential

Animals are ranked to make selection simple; high index Texel rams (Top 5% and above) add over £650 to their commercial progeny compared to those ranked as average.

Which Index?

Prime lamb producers should use the **terminal index** as this is weighted for meat production. Pedigree breeders and producers retaining female replacements should use the **replacement index** as this balances maternal and carcass traits.

	Growth	Musc. wt	Fat weight	Repro.	Index	Index Acc.	Ranking

Replacement	TOP 1%	TOP 1%	TOP 1%	TOP 25%	£11.79	81%	TOP 1%

Sub-indexes for growth, muscle and fat weight and reproduction allow breeders and commercial producers to identify animals that offer advantages in areas to suit their production goals. E.g. targeting a ram that ranks highly for fat weight for mating to lean females, to produce lambs that finish well.

Accuracy Matters

Indexes are backed by an accuracy percentage - giving confidence in how reliably an animal will pass traits on to the next generation. Higher accuracy reduces risk and supports confident breeding decisions.

Why Use Performance Information?

- ✓ Improve flock efficiency
- ✓ Increase carcass value
- ✓ Breed replacements with stronger maternal traits
- ✓ Make informed purchasing decisions
- ✓ Select genetics with confidence
