Performance Pays with Texel Indexes

Breed Better. Buy Smarter. Reduce Risk.

Texel Performance Indexes are designed to help commercial producers and pedigree breeders identify animals with the greatest potential to improve flock profitability.

Higher Value = Higher Potential

Animals are ranked to make selection simple; high index Texel rams (Top 5% and above) add over £650 to their commercial progeny compared to those ranked as average.

Which Index?

Prime lamb producers should use the **terminal index** as this is weighted for meat production. Pedigree breeders and producers retaining female replacements should use the **replacement index** as this balances maternal and carcass traits.

Scrapie: ARR/ARR | Microphthalmia: G/G | MV: 1,4

Inbreeding 0.0

DNA-verified sire **TEXEL HULK** by **STONELEIGH FOREMOST**

DNA-verified dam **TXL2409050(2)** by **TEXEL GREATEST SHOWMAN**

	Growth	Musc. wt	Fat weight	Repro.	Index	Index Acc.	Ranking
Terminal	TOP 1%	TOP 1%	TOP 1%	AVG+	£11.68	82%	TOP 1%
Replacement	TOP 1%	TOP 1%	TOP 1%	TOP 25%	£11.79	81%	TOP 1%

Sub-indexes for growth, muscle and fat weight and reproduction allow breeders and commercial producers to identify animals that offer advantages in areas to suit their production goals. E.g. targeting a ram that ranks highly for fat weight for mating to lean females, to produce lambs that finish well.

Accuracy Matters

Indexes are backed by an accuracy percentage - giving confidence in how reliably an animal will pass traits on to the next generation. Higher accuracy reduces risk and supports confident breeding decisions.

Why Use Performance Information?

- ✓ Improve flock efficiency
- ✓ Increase carcass value
- ✓ Breed replacements with stronger maternal traits
- ✓ Make informed purchasing decisions
- ✓ Select genetics with confidence
